Department of Transformation and Shared Services

Governor Asa Hutchinson

Secretary Amy Fecher

Director Mitch Rouse

May 6, 2022

The Honorable Terry Rice, Co-Chairperson
The Honorable Jeff Wardlaw, Co-Chairperson
Arkansas Legislative Council
State Capitol Building, Room 315
Little Rock, Arkansas 72201

Dear Senator Rice and Representative Wardlaw:

Under Arkansas Procurement Law, all non-exempt contracts for "services," as defined in Arkansas Procurement Law, must be presented for legislative review if they have an annual contract amount that equals or exceeds fifty thousand dollars (\$50,000) in any contract year or a total projected contract amount of three hundred fifty thousand dollars (\$350,000) over the term of the contract. See Ark. Code Ann. § 19-11-265.

The Arkansas Development Finance Authority (ADFA) submitted Contract # 4600050374 for services without soliciting competing quotes with a competitive sealed bid as required under Arkansas Code Annotated § 19-11-229 (b)(1). ADFA has prepared a letter explaining the circumstances. The letter is being included with the contracts being presented for review.

None of the other contracts submitted by TSS OSP appear, on their face, to have been procured in violation of Arkansas Procurement Law. We ask for their favorable review.

Should you have any questions, we will do our best to see that they are answered.

Sincerely,

A handwritten signature in blue ink, appearing to read "Mitch Rouse", is written over a light blue horizontal line.

Mitch Rouse

	95,640.00		The product that is being requested is Elastic SIEM with XDR (Security Information and Event Manager with Extended Detection and Response). In the most basic sense, this will allow us to correlate, investigate and respond to alerts by utilizing: • Firewall and VPN logs • User events (such as account lockouts, user account modifications, file share events through Varonis logs, etc) • Elastic Security for Endpoint related events (antivirus alerts, attempted brute force attacks when users are off-site, ransomware and malware protection) • External Threat Intelligence Feeds (actionable threat data related to artifacts or indicators collected from any third-party vendors to learn from other company"s visibility and access to enhance your own cyber threat response and awareness) Currently, we must manually correlate events across each of the security devices. Integrating external threat intelligence feeds into Elastic will allow us to quickly recognize and remediate potential cybersecurity concerns within the agency. The Elastic Endpoint Security works on Windows, macOS, and Linux environments. By utilizing the Elastic Endpoint Security for Extended Detection and Response, we will eliminate the need for Malwarebytes (based on FY21 invoices a savings of \$39,590/yr)
